

MYOS-M 600X600

A range of recessed luminaires with medium power LED modules using Multioptic® lens technology, specially designed for use in combination with exposed grid ceilings. Myos-M 600x600 Multioptic contains a set of 99 medium wattage LEDs behind a decorative aperture mask. Each LED is fitted with an individual secondary lens providing superb light distribution. The housing is made of steel, powder coated RAL9016 or RAL9010 with a textured finish.

- Integrates seamlessly into exposed grid ceilings
- Architectural design
- Equipped with 99 lenses (UGR<16-19)
